**Course / Project Title:** Master Builders Association of SA Inc Youth Employment Program

**Target Group:**

<table>
<thead>
<tr>
<th></th>
<th>16-24 years</th>
<th>25-39</th>
<th>Indigenous</th>
<th>Disabled</th>
</tr>
</thead>
</table>

**Course / Project Description:**

The project aims to provide accredited and relevant AQF Certificate 1 training to a selected number of youth to develop work readiness and enable the participants to be employed within the concreting sector of the construction industry at the conclusion of the program.

As part of this training, participants will be taken on 3 industry site visits covering cement manufacture, precast production and finishing processes and multi story commercial operations. They will also be offered, on a rotation basis, a further full week with Boral Construction Materials at various sites and plants, including quarries, laboratories and delivery trucking enabling them to gain an understanding of the broader concreting industry.

This project will further provide workplace training to participants by assigning them to an employer attached to the Master Builders Association database on a non-commercial site. Employers have been identified in an industry area currently experiencing chronic skill shortages – concreting sector. In partnership with, participants will develop training and employment pathways into this sector.

Participants will gain accredited theory training through being taught at Master Builders Association headquarters, or at an alternate facility depending on availability and suitability to training requirements.

Participants will be sourced predominately from the Western and Southern regions, with where possible promotional activities, training and skills development activities being conducted in those regions to raise awareness of the program and its partners.

The Project Manager and Workplace Supervisors/Assessors will monitor participant’s progress on the worksite. Participants will also be given the opportunity to explore further training options with the Master Builders Association should it be their wish to do so.

**Learning Outcomes will include:**

- Attendance / punctuality.
- Completion of OHS&W Induction/Green Card
- Completion of units for Certificate 1 - General Construction
- Follow OH&S policies and procedures
- Work effectively in the general construction industry
- Plan and organise work
- Conduct workplace communication
- Carry out measurements and calculations
